

CareBridge's Electronic Visit Verification Platform Achieves National CMS Certification

NASHVILLE, TN – CareBridge, the nation's leading Medicaid value-based care company, announced its Electronic Visit Verification (EVV) solution has received certification from the Centers for Medicare and Medicaid Services (CMS). CareBridge completed this certification in partnership with the Wyoming Department of Health.

This certification affirms both CareBridge and Wyoming's dedication to meeting the rigorous quality standards set forth by CMS and highlights both parties' commitment to delivering compliant and high-quality EVV solutions for the clients they serve.

“CareBridge offers industry-leading EVV and data aggregation services that include detailed, real-time sharing of clinical information between members, caregivers, health plans, and state officials,” said Puneet Singh, Chief Executive Officer of CareBridge. “This certification reinforces our commitment to providing the best possible EVV solution with the highest levels of compliance and quality.”

The CMS certification process is a comprehensive evaluation that assesses the EVV system's compliance with CMS guidelines and regulations that consists of an in-depth review of the system's technical specifications, data security, privacy measures, audit capabilities, and its ability to integrate with existing healthcare data systems. CareBridge's EVV system is currently deployed across six states.

“The certification reinforces CareBridge's position as one of the leading EVV partners for states and health plans in the evolving landscape of home care services,” said Mike Tudeen, Vice Chair of CareBridge. “It is a great compliment to CareBridge's other value-based care solutions that help states and health plans improve quality and independence for their HCBS members.”

CareBridge would like to extend its sincere appreciation to the Wyoming Department of Health for its instrumental support and engagement through the certification process. The Department's valuable insights, feedback, and active participation have played a pivotal role in shaping the development and refinement of CareBridge's EVV solution.

About CareBridge

CareBridge is a value-based healthcare company that assists health plans and states in caring for individuals receiving home and community-based services. CareBridge's solutions include 24/7 clinical support, decision support, data aggregation, and electronic visit verification.
